

```
#include <iostream>
using namespace std;

int main() {
    float base, altura, area;
    cout << "Ingrese la base: ";
    cin >> base;
    cout << "Ingrese la altura: ";
    cin >> altura;
    area = base * altura;
    cout << "El area del rectangulo es: " << area;
    return 0;
}

}
```
