

```
#include <iostream>
using namespace std;
int main() {
float nota[6];
int aprobados = 0, reprobados = 0;
for (int i = 0; i < 6; i++) {
cout << "Nota " << i + 1 << ": ";
cin >> nota[i];
if (nota[i] >= 7) aprobados++;
else reprobados++;
}
cout << "Aprobados: " << aprobados << endl;
cout << "Reprobados: " << reprobados;
return 0;
}
```
