

```
#include <iostream>
#include <string>
using namespace std;

string invertirCadena(string cad){
    string inv="";
    for(int i=cad.size()-1;i>=0;i--)
        inv+=cad[i];
    return inv;
}

int main(){
    string cad;
    cout << "Ingrese una palabra: ";
    cin >> cad;
    cout << "Invertida: " << invertirCadena(cad);
    return 0;
}
```
