

```
#include <iostream>
using namespace std;

int main() {
    float a, b;
    cout << "Ingresa dos numeros: ";
    cin >> a >> b;
    if (b != 0)
        cout << "La division es: " << a / b;
    else
        cout << "Error: division entre cero";
    return 0;
}
```
